

GLAMOUR GLASS CURVED WAND

This curved wand dildo is made of Borosilicate glass which is very strong, non-porous, hygienic and safe for the body. The curved shape is excellent for precision stimulation, the ball shaped ends are perfect to reach the G-spot and for a variation of pressure and sensations. Truly versatile and truly exciting, with a glamorous look and soap bubble colours.

Glass is great for temperature play. Store the dildo in the fridge or put it in hot water before use and enjoy the tingling cold or exciting warm sensations. The glass material can be cleaned with soapy water, you don't need boiling water but it's very well possible if you prefer this. Don't worry about the colours of the toy, they won't wear off because they are not an external layer on the glass, but baked into the material, so they are IN the glass.

FEATURES

- Glass wand dildo
- Double ended
- Great for G-spot stimulation and variation in pressure
- Perfect for temperature play
- Made of borosilicate glass, body safe and hygienic

Borosilicate glass is also called Hard Glass. It is made of silica and boron trioxide and much more resistant to thermal shock than common glass. Not only is borosilicate glass stronger, it is lighter than common glass too. This makes it very suitable for lots of products.
